SUPPLEMENT TO REPLY COMMENTS

CWA Broadcasting, Inc. ("CWA"), the licensee of Station WINX-FM, Cambridge, Maryland (the "Station" or "WINX"), by its attorneys and pursuant to *Public Notice*, Report No. 2685, released December 9, 2004, hereby submits this Supplement to Reply Comments in the above-referenced proceeding in which CWA seeks to modify the Station's community of license from St. Michaels, Maryland to its original community of license, Cambridge, Maryland, and upgrade its operation to Class B1 on Channel 232.¹ In support thereof, CWA states as follows.

On December 27, 2004, CWA submitted its Reply Comments in the instant proceeding. Contained as Exhibit A to that pleading was the Engineering Statement of the consulting firm of Cavell, Mertz & Davis, Inc. ("Cavell Firm"). The Engineering Statement supplied evidence as to the gains and losses of services that would result from the engineering proposals of the parties to the proceeding.

¹ A Petition for Leave to File Supplement to Reply Comments is being filed simultaneously herewith.

Subsequent to the filing of the Reply Comments, the Cavell Firm discovered that their software program did not accurately measure AM contours. The Cavell Firm has redone its work and prepared a revised Table I to its Engineering Statement, dealing with the gains and losses of service resulting from the proposed allotment change for WINX-FM. That revised Table I is attached hereto as Exhibit A.

The only material differences between the original and revised Table I is in the loss area. It shows that instead of providing a loss in service to individuals and areas receiving less than five services, the loss area is currently served by five or more services. The other changes do not significantly alter the gain areas and minimally decrease the total underserved populations that will be served by the proposed allotment change.

Respectfully submitted,

CWA BROADCASTING, INC.
